

AIDS and Tuberculosis Awareness Seminar

We have established a learning center for AIDS and tuberculosis. The good health and well being of our employees is a primary company goal. PDM received a certificate in Health Care from the Thailand Government Department of Health. We strongly promote and encourage employees to stop smoking. We provide educational forums to discus health related problems and the treatments and support available to assist employees to stop smoking.

Our health awareness programs are recognized as industry leaders in Thailand and our senior people have been invited to give lectures to corporate enterprises both locally and regionally. A senior executive Mr. Prayoon Boonyasatid was invited by ASEAN to talk about AIDS in the workplace at a recent Bali, Indonesia conference.
