

The health and safety of those people who manufacture, handle & use VELOIL products is of paramount importance to us. We are also committed to the protection of the environment through our operating practices and the careful formulation of our products.

Most of our products are generally regarded as being safe. No special precautions are normally required when handling them. However, as most products are petroleum based, good personal hygiene is recommended.

Prolonged and repeated skin contact should be avoided. After any spills or personal contact, the skin area should be washed with soap and water. Clothing should be laundered.

All relevant information for each product is available on the Material Safety Data Sheet. We urge you to obtain and carefully read these sheets.

The VELOIL facility that manufactures and fills our products was awarded in 2004 a prestigious Prime Minister's Award for excellence in workplace safety and environmental awareness.
